Connect and go!
Create and change imprints easily using the COLOP® e-mark app. The app is available for iOS or Android mobile devices or tablets and connects to the device via WIFI connectivity. A USB connection is required for PC based usage.

Colorful imprints
An easy to replace tricolor ink cartridge allows users to create and use full color imprint designs.

One-for-all functionality
The e-mark offers date, time, and both static and automatic numbering capabilities. Users can also generate barcodes and QR-codes directly in the app.

Ready-to-use templates
The e-mark app comes pre-loaded with many templates including: Address, Date, Stock Text, Numbering, Motivational Messages, and many more!

Imprint Capabilities
The e-mark can be used to make an imprint up to 5.9″ long. The imprint space can be divided into two or three stacked imprints. Each imprint is $9/16$″ height and can contain multiple lines of text. There's also a repeat marking function to allow users an endless string of repeated imprints.

Mark any absorbent surface
The e-mark works on a variety of absorbent surfaces including paper, cardboard, books, and paper bags.
